Textile Research

Vol. XIII, Nov. 1942–Dec. 1943

RESEARCH REPORTS, ARTICLES AND BOOK REVIEWS

Subject Index

ACTIVITIES OF THE INSTITUTE

	NO.	PAGE
Applied Research Program	14	12
Malcolm E. Campbell: Joins staff of Institute	6	6
Cotton Carding: Announcement of the Institute's cotton carding	13	11
Industry-Wide Research: Announcement of Institute's five-point program	8	2
Industry-Wide Research Program: Institute's plan for linking research with higher education	11	2
Intensive Study of Cotton Carding: Digest of Malcolm Campbell's paper given at 1943 annual meeting	14	14
New Economic Research Committee: Robert R. West assumes chairmanship	11	4
Properties of Clothing Fabrics: Digest of symposium at 1943 annual meeting	14	21
Report to Members: President's annual report given at 1942 annual meeting	2	2
Research in the South: Research developments and interests among the southern mills as reported to the president of the Institute during a trip through the South	1	2
Research Manager: Giles E. Hopkins joins Institute staff	12	11
Textile Research Institute: Digest of 1943 annual report of President Blanchard	14	4
Textile Research Institute: Report of 1943 Annual Meeting	14	2
Thirteenth Annual Meeting: Report of 1942 annual meeting	2	8
Treasurer's Report: For fiscal year ending Sept. 30, 1942	2	44
Wool Program: Digest of discussion at 1943 annual meeting	14	19
Douglas G. Woolf Joins Institute	12	2

GENERAL

	NO.	PAGE
Army Service Forces: Functions of research and development described by Lt. Col. Frank M. Steadman	7	10
The British Textile Industry: Excerpts from Address by Samuel Courtauld before British Rayon Federation	11	8
Committee for Economic Development: Outline of organization and functions of a working committee established by industry	6	2
Fundamental Research: Digest of address by Dr. Hugh S. Taylor at 1943 annual luncheon of Textile Research Institute	14	8
Growth of Research: Digest of address by Dr. C. E. K. Mees at 1942 Annual Meeting of Textile Research Institute.	2	12
Healthy Research Competition: Douglas G. Woolf clarifies the relationship of research organizations within the textile industry and emphasizes the need of coordination	16	16
Industrial Cotton Fabrics: by B. L. Whittier	13	12
Man-Made Fibers: H. R. Mauersberger's suggestion for classification of Fibers.	6	10
A Modern Conditioning Cabinet: Description of homemade cabinet in use at Manville-Jenckes Corp.	13	18
Modern Textile Technology: I. Outline of modern methods and modern instruments for research	2	20
Modern Textile Technology. II. Merging Molecules: Discussion of fiber properties	4	4
The New Textile Technology: Discussion of physical structure and properties of fibers	8	11
Patents of Foreign Nationals: Announcement of Alien Property Custodian plan for making available seized Patents	4	13
Planning Corporate Research and Development: (A series of articles by H. Wickliffe Rose)		
Inter-research—The Present Need	8	4
Research and the Patent System—Part I—The Individual Inventor	9	9
Research and the Patent System—Part II—Patents and the Corporation	10	2
Research and the Patent System—Part III—The Commercialization of Patents	11	10
The Future of the Corporation	12	5
Research Manpower in High Schools: Practical plan as applied at Alexander Smith & Sons Carpet Co.	3	2
Technological Mobilization: Review of Senate Bill S.2721 proposing Government controlled research facilities	4	2
Tendering of Cotton Fabrics: Digest of paper by Lt. Col. Frank M. Steadman at 1942 Annual Meeting of Textile Research Institute	2	15
Will Post-War Organization of Texile Companies Be Vertical or Horizontal?	14	30

NEW PRODUCTS, PROCESSES, AND TEST METHODS

	NO.	PAGE
Cleaning Cotton at the Gin: Description of new device	7	2
Continuous Indigo Piece Dyeing: Description of new process	5	2
Gold Lace for the Navy	9	2
Impact Testing of Textiles	8	21
Measuring Fiber Fineness: A new method for rapid testing	1	12
Plastic Bonded Cotton Fiber: Description of new method of forming a thin lap of parallel cotton fibers for use in plastic laminates	2	25
Properties of Bubblfil: Digest of talk by Joseph B. Quig	3	8

RESEARCH REPORTS

	NO.	PAGE
Acid Dyeing of Wool: Studies of the reactions in complex dye baths	2	33
Chemically Modified Wool: Report of process developed by Research Associates, Textile Foundation	1	21
Combination of Sheet with Blanket: Tests indicate improved warmth for outdoor use through combination	6	13

RESEARCH REPORTS

	NO.	PAGE
Acid Dyeing of Wool: Studies of the reactions in complex dye baths	2	33
Chemically Modified Wool: Report of process developed by Research Associates, Textile Foundation	1	21
Combination of Sheet with Blanket: Tests indicate improved warmth for outdoor use through combination	6	13

	NO.	PAGE
Controlled Molecular Length: Studies of mechanical properties of cellulose acetate films in relation to molecular chain length, by Research Associates, Textile Foundation	3	17
Cotton Fiber Strength Study: Report of U. S. Dept. of Agriculture tests using the Pressley tester	9	17
A Cotton Slasher Blanket: Report of tests of two types of cotton blankets for covering squeeze rools on a slasher	1	4
The Drying of Textiles: Report of textile drying research conducted by Textile Research Institute	5	15
Effect of Storage on Fabrics: Report from Bureau of Home Economics, U. S. Dept. of Agriculture	6	20
Infra-Red Drying of Textiles: Results of tests conducted with gas-generated radiant heat	10	18
Infra-Red Drying: Letter from Red-Ray Mfg. Co. regarding article by Stefan L. Grapnel in Aug. 1943 TEXTILE RESEARCH	12	21
The Lateral Expansion of Cotton Fibers under Tension: Report of study conducted at the Southern Regional Research Laboratory	11	21
Part-Wool Blankets for Barracks: Comparison of quantities of standard all-wool army blanket with those of blankets constructed of a mixture of wool and cotton	5	10
The Physical Properties of Nylon: Survey of literature and compilation of data	7	24
Proper Starching Technique: Effect of starching variables on fabric stiffness	11	26
The Quality of Cotton Yarn: effects of varying the percentage of comber waste on	8	16
Strength of Cotton Fiber Bundles: Data on tensile strengths of cotton	4	18
The Stress-Strain-Time-Temperature and Humidity Behavior of Textile Fibers: An explanation of the book "Elastic and Creep Properties of Filamentous Materials and Other High Polymers"	13	2
Structure of the Wool Fiber as Revealed by Electron Microscope:	12	15
Warmth of Blanket Materials: Digest of report by Ephraim Freedman of R. H. Macy & Co.	13	21
Warmth Without Weight: Tests of application of reflective films to textiles	7	16
Water-Repellent Finishes: Effects of water temperature in evaluating the efficiency of finishes	10	11
Wool Protein with Weak Acids: Studies of Research Associates, Textile Foundation	4	24
RESEARCH AIDS		
Load-Elongation Testing of Fibers. Illustrated description of autographic single fiber tester	9	20
Small Mobile Electron Microscopes. Illustrated description of R. C. A. and G. E. portable and semi-portable models	5	13
Tex Test Kit to Identify Fabrics. Illustrated description of pocket size textile identification kit	4	22
Thermal Transmission Tester. Apparatus in use at Bureau of Standards	10	16
Weathering Tester. Description of twin-arc Weather-Ometer	7	15
BOOK REVIEWS		
Allocations and Priorities Guide	13	23
A. S. T. M. Standards	7	15
Bulletin of the Wool Manufacturers	12	24
Cellulose Chemistry	7	14
The Chemical Formulary	13	24
The Chemistry of Natural Coloring Matters	6	18
The Dermatitis Test as a Necessary Routine Check-Up	12	25
Functional Properties of Clothing Fabrics	14	21
The Fireproofing of Textiles	9	20
Glue and Gelatine	13	24

ABSTRACTS

Subject Index (Cross-Indexed)

A

	NO.	PAGE
Abrasion Test for Textiles	6	36
Absorption		
Comparison of Methods for the Determination of Water Absorbency by Terry Towels	10	29
Density and Sorptive Capacity of Some Samples of Cotton, Silk, and Wool	7	32
Sorption of Basic Dyes by Cellulose	10	33
Acetates: Quantitative Estimation of Acetyl in Carbohydrate Acetates	9	23
Acid		
Action of Strong Acid on Various Fibers	5	42
Adipic Acid: A Review	9	23
Colored Chromatograms with Higher Fatty Acids	9	23
Identification of Some Sulfanic Acid Reduction Products of Azo Dyes	12	27
Ageing: Report of AATCC Committee on Accelerated Ageing Tests for Sulfur-Dyed Materials	13	26
Algin—Its Use in the Textile Industry and Its Possibilities of Spinning into Filaments	4	36
Alkalies, Change in Textile Fibers Caused by	9	28
Analysis		
Amylose and Amylopectin Content of Starches, Determined by Their Iodine Complex Formation	6	39
Dissociation Constants and pH-Titration Curves at Constant Ionic Strength from Electro-Metric Titrations in Cells without Liquid Junction: Titrations of Formic Acid and Acetic Acid	10	30
Graphical Method for Obtaining "Oven Dry" Cotton Percentages in Government Lining Fabrics	11	32
Cotton-Viscose Rayon Mixtures, Quantitative Analysis of	6	38
Linen in Part Linen Fabrics, Quantitative Analysis of	5	36
Organic Compounds, Microdetermination of Hydroxyl Content of	7	28
Quantitative Determination of Methoxyl and Ethoxyl Groups	5	36
Starch in Textile Fabrics, Rapid Colorimetric Method for the Quantitative Determination of	13	26
Starch, Rapid Determination of	7	9
Separation and Determination of Protein Sulfur, Sulfide Sulfur, and other Sulfur in Sodium Sulfide Dispersions of Keratins	5	37
See also Testing.		
Antiseptic: Self-Antiseptic Properties in Clothing	8	39
Army Overcoatings, Weaving O.D.	5	46

B

	NO.	PAGE
Baling Cloth, Streamlined System of	12	32
Blankets: Advantages of a Blanket-and-Sheet Combination for Outdoor Use	7	39
Part-Wool for Use in Barracks	7	38
Bleaching: Continuous Peroxide Bleaching as Developed in the Piedmont Section	4	35
Bubblfil, Development, Properties, and Uses	6	46

C

	NO.	PAGE
Camouflage, Role of Textiles in. Data which Will Help Mill Men to Meet Requirements of Army and Marine Corps	11	38
Carbonizing		
Study of the Neutralizing of Carbonized 32 OS. Olive-Drab Overcoating	11	37
Theory and Practice of Carbonization	10	39
Carding: Carding-Spinning Discussion by Mail Held by Georgia Group	10	39
Cotton Card Flat Strips	10	38
Carpets, Wear Testing of	3	39
Cellobiose, Synthesis of	4	34
Cellulose		
Acetylation. Effect on Water-Binding Properties	7	30
Action of Light on		
Application of Copper Number Determination to Cellulose Acetate	12	6
Viscosity-Concentration Relations of Cellulose Acetate Solutions	7	29
Action of Ultraviolet Light upon Cellulose and Its Compounds	8	31
Adsorption of Water Vapour by	3	32

	NO.	PAGE
Analysis of Cellulose Derivatives. Determination of Free Hydroxyl Content	4	33
Analogy Between Molecular Structure and Mechanical Behavior of Cellulose and Rubber	5	39
Behavior of the Cellulose Fiber Under the Electron Microscope	8	31
Carbohydrates. XIII. The Supermolecular Constitution of. XIV. The Supermolecular Reactivity of. XV. The Supermolecular Reactivity of	10	32
Copper Compounds in Relation to Cellulosic Materials	8	38
Crystallinity in Cellulose Esters	5	36
Decomposition of Cellulose Through Molds and Bacteria	8	40
Determination of Alkoxyl Groups in Cellulose Ethers	4	34
Determining the Deterioration of Cellulose Caused by Fungi. Improvements in Methods	9	23
Different Forms of	8	31
Effect of the Degree of Polymerization on the Mechanical Properties of Regenerated Cellulose Fibers	5	39
Effect of Oxygen on the Determination of the Polymerization Degree of Cellulose in Cuprammonium Solution	8	32
Estimation of Volatile Acyl Groups in Cellulose Esters	9	24
Hydrolysis and Catalytic Oxidation of Cellulosic Materials	4	33
Hydrolysis in Phosphoric Acid Solution	9	24
Kinetics of Oxidation with Periodic Acid	14	38
O-Pentaacetyl-d-Gluconates of Polyhydric Alcohols and Cellulose	3	32
Oxidized Cellulose	10	32
Physical Chemistry of the Cellulose Molecule	10	32
Reactions in Liquid Sulfur Dioxide	3	32
Reactions in Liquid Sulphur Dioxide	4	33
Reaction Between Cellulose and Formaldehyde	9	25
Role of Salts in the Dyeing with Substantive Dyes	4	34
Special Kind of Raw Materials for Nitration. Theoretical Considerations on Nitration of Cellulose	10	33
Vinyl Ethers of	10	32
Cellulose Acetate		
Formation of Anhydro Structures by the Alkaline Deacylation of a Partly Substituted Cellulose Acetate p-Toluenesulfonate	7	30
Mechanical Properties as Related to Molecular Chain Length	5	4
Cellulose Insulation, Factors Affecting the Mechanical Deterioration of	6	47
Chemicals		
Fluorescent Chemicals, Some Applications of	12	28
Non-Ionic Surface Active Agents	8	34
Surface-Active Agents	6	39
Surface Active Agents Manufactured in America and Commercially Available	6	39
Cholesterol: Cholesterol in the Rayon Industry	3	38
Chrome Azo Dyes, Chemical Constitution of	6	42
Cloth Wearing Tester, New Design of	3	39
Color: Report of Committee on Color	12	29
Color-Blindness		
Evolution of Color Vision Tests	10	31
Facts of Color-Blindness	10	30
Farnsworth-Munsell 100-Hue and Dichotomous Tests for Color Vision	14	38
Methodology in Test Preparation	10	31
Single Judgment Test for Red-Green Discrimination	14	38
Symposium on Color-Blindness	10	30
Color Matching, Physical Significance of the Dyer's System of	7	33
Color Measurement: Tristimulus Specification of the "Munsell Book of Color" from Spectrophotometric Measurements	11	33
Colorfastness		
Effect of Resin Finishes on the Colorfastness and Physical Properties of Rayon Gabardines	1	40
Report of Committee on Group M (AATCC)—Fastness to Washing of Dyed and Printed Manufactured Organic Fibers	9	24
Colorimetry		
Final Report of the O.S.A. Subcommittee on the Spacing of the Munsell Colors	11	33
Historical Background and Evolution of the Colorimetry Report	14	37
Psychological Color Solid	11	34
Trichromatic Specifications for Intermediate and Special Colors of the Munsell System	11	33
Copolymers: Structure of Copolymers of Vinyl Chloride and Acetate	3	35
Copper Compounds: Copper Compounds in Relation to Cellulosic Materials	8	38
Cotton		
Cleaning Cotton at the Gin	9	29
Comparative Manufacturing Performance and Fiber Properties of Certain Long-Staple Cottons	10	36
Picker-Room Lap-Weight Control	7	38
Plastic Bonded Cotton	5	48
Quantitative Analysis of Cotton-Viscose Rayon Mixtures	8	30
Staple Length	7	28
Structure, Properties, and Utilization of	1	39
Cotton Fabrics, Problem of Tendering of	6	48
Cotton Hosiery: Portfolio of Design	3	13
Cotton Yarns, Impregnation with Latex	5	43
Cystine Linkage, Reactivity of, in Keratin Fibers. Part I. The Action of Alkalis	3	38
D		
Damage		
Damages in Cotton Fabrics During Dyeing, Bleaching and Printing	9	26
Fungi, Molds and Mildews in Textiles.	7	40
New Method for Quantitative Determination of Moth Damage to Textile Fibers	13	25
See also Mildews.		
Defects		
Detection of Acid or Basic Substances in Damaged Fabrics	10	29
Prevention of in Piece-Dyed Textiles	9	26
Diastase: Effect of Inorganic Compounds on the Activity of Malt Diastase	10	33
Diazo-Coupling: Mechanism of the Diazo-Coupling Reaction	7	31
Dichromate: Economy in the Use of Sodium Dichromate When Dyeing Wool with Mordant Dyestuffs	6	42
Direct Cotton Dyes, Common Salt, and Common Sense	6	42
Dry Cleaning: Report of AATCC Committee on Fastness to	13	25
Drying		
Determination of Slasher Speeds and Temperatures for Different Yarn Numbers	7	37
Rayon	13	27
Study of the Effects of Extracting and Drying on the Carding and Spinning of Raw Stock Dyed Cotton	7	37
Textiles	13	28
Dyeing		
Application of Water Dispersed Pigment Colors to Textiles	10	33
Casein Fiber and Its Dyeing Qualities.	9	27

	NO.	PAGE
Cheeses for Pressure Yarn Dyeing	6	47
Chlorinated Wool, Causes of the Uneven Dyeing of	11	37
Chrome Azo Dyes, Chemical Constitution of	6	42
Comparison of Methods for Improving Substantive Colors	7	34
Continuous Dyeing of Indigo	11	36
Development of the Production of Viscose Rayon Dyed During the Spinning Process	8	36
Direct Cotton Dyes, Common Salt, and Common Sense	6	42
Dyeing of		
Carbonized Pieces	11	36
Cellulose Acetate Rayon with Dispersed Dyes	3	37
Cotton and Synthetic Fiber with Sulfur Dyes with a Subsequent Fixing Treatment	7	33
Cotton-Rayon Mixtures	7	34
Cotton with Mineral Khaki IV. A Comparison of the Penetration, Rubbing, Fastness and Handle of Cotton Dyed with Pigments Produced by Chromate and Alkali Development Methods	3	36
Natural Grasses	9	27
Nylon with Dispersed Dyes	12	30
Nylon with Direct Cotton, Azoic and Vat Dyes	12	30
Piece Goods for the Navy—General Requirements and Specifications	5	44
Rayon and Some New Developments	8	36
Redwood Fibers	13	29
Viscose During Spinning	8	36
Wool with Indigosol O in Esser's Apparatus	9	27
Woolen Piece Goods for the Navy—Continuous Indigo Dyeing on Woolen Piece Goods	5	45
Woolen Piece Goods for the Navy—Piece Goods Dyeing with Leuco Ester of Indigo	6	43
Economy in the Use of Sodium Dichromate When Dyeing Wool with Mordant Dyestuffs	6	42
Increasing the Sensitivity of Hair to Dyes	8	35
Influence of Acid Dyes on the Setting Properties of Wool Fibers	12	28
Microscopical Observations of Wool Dyeing. Part III—Physical Factors Affecting Color Value	11	37
Modern Theory and Practice of Wool Dyeing. IX. Chrome Dyes: Choice of Method and Dyes	7	34
Modern Theory and Practice of Wool Dyeing. Part X. The Nealon (S.C.I.) and Palatine Fast (I.G.) Colours	9	27
New Starch Thickeners from Hydro-Lyzed Starch for Basic Printing Dyes	7	34
Physical Significance of the Dyer's System of Colour Matching	7	33
Pretreatment of Acetate Rayon	10	34
Prevention of Defects in Piece-Dyed Textiles	9	26
Processing of Synthetic Fibers and Fabrics. Part 2	5	44
Processing of Aralac	12	29
Producing Solid Shades with Vats on Viscose Cotton Unions	5	43
Rayon Dyeing	10	34
Recent Advances in Fur Dyeing	8	35
Reducing Time of Vat Dyeing with Textrone	8	37
Sorption of Basic Dyes by Cellulose	10	33
Steaming Method for Developing Indigosols	8	36
Stripping of Vat Dyeings	9	27
Studies in the Naphthol as Series. Part V. Synthetic Experiments	3	36
Sulfonated Oil Products. Notes on Some Properties and Uses in Textile Processing, "Technicus"	11	40
Theory and Practice of the Reduction and Oxidation of Indianthrone and Its Derivatives: Indianthren Blues	12	27
Top Dyeing and Blending	5	44
Treating Army Lightweight Protective Covering Materials	10	35
Treatment of Dyed Rayon with Emulsions	10	34
Vat Dyeing OD Army Underwear	8	37
Vat Dyeing Spun Rayon and Blends of Cotton, Wool and Acetate	11	37
Vat Dyeing Spun Rayon and Blends of Cotton, Wool and Acetate Spun Rayon-Wool Fabrics—Part IX of a Series on Wartime Dyeing	13	29
Vat Dyeing of Viscose Rayons	1	40
Vat Dyeing of Viscose Rayons	5	43
Visual Observations in the Infra-Red	12	26
Dyeing Research		
Combination of Wool Protein with Acids in Mixtures, and Its Relation to the Acid Dyeing of Wool	5	42
Metachroism and Dichroism of Dyed Fibers as a Result of the Size and Shape of the Fiber Particles and Dyestuff Particles	5	41

E

Elasticity: Elasticity of a Net Work of Long-Chain Molecules	6	41
Electrolytic Cell: Alkali-Chlorine Cells in Modern Textile Factories	7	40
Electron Microscopy: Electron Microscopy of Cellulose	6	37
Electronics: New Servants for Textile-Mills—Electronic Equipment Proves Versatility by Performing Many Important Duties	7	39
Electrostatics: Direct Production of Staple Fibers from Acetycellulose According to an Electric Spinning Process	11	36
Employment		
Postwar Textile Manpower Plans	10	40
Streamlined Training	11	39
Training New Employees Quickly	11	39
Enzymes		
Enzymic Degradation of Cell Wall Substances. Part I	7	32
Studies of the Damaging Action of Microorganisms on Differently Oriented Synthetic Textile Fibers	9	26
See also Mildews.		

F

Fabrics		
Cotton Slasher Blanket	4	16
Damages in Cotton Fabrics during Dyeing, Bleaching and Printing	9	26
Defects Charted	5	47
Detection of Acid or Basic Substances in Damaged Fabrics	10	29
Deterioration of Flameproofed Cotton Fabric	14	38
Fabric Pests	7	28
Fatigue of	3	40
Manual of Military Fabrics. III. 8.2 oz. Cotton Twill Type I	8	39
Manual of Military Fabrics. IV. 8.2 oz. Cotton Twill Type II	10	38
Manual of Military Fabrics. VI. 8.2 oz Cotton Twill Type IV	11	39
Mildewproofed Cotton Fabrics	10	38

	NO.	PAGE
Physical Methods for Evaluating the Hand of Fabrics and for Determining the Effects of Certain Textile Finishing Processes	1	39
Preparation of Leather-Fiber Fabric	13	30
Production of Coated Fabrics	4	15
Seam Strength of Common Rayon Dress Fabrics	7	39
Treating Army Lightweight Protective Covering Materials	10	35
Fade-ometers, Calibration of	5	36
Fatigue: Flexural Fatigue of Textiles	3	40
Fiber		
Camel Family	8	39
Change Caused by Alkalies	9	28
Comparative Manufacturing Performance and Fiber Properties of Certain Long-Staple Cottons	10	36
Cotton Fiber-Length Determination Using the Fibrograph	10	29
Density and Sorptive Capacity of Some Samples of Cotton, Silk, and Wool. III. Determinations on Egyptian Cotton	7	32
Development of Synthetic Protein Fibers and Their Practical Value, with Special Reference to "Thiozell." III	11	35
Dielectric Properties of Animal Fibers	11	34
